

**Get it done.**

# GET TO KNOW THE QUINN ADVANTAGE

The Quinn Advantage is Quinn’s promise to our clients that we continue to deliver on, even after more than 45 years in business. Through ongoing growth and change, Quinn has not strayed from our long-standing values. From corporate processes, to safety standards, to client satisfaction, we never stop seeking ways to assess, improve and advance. This unwavering commitment to continuous quality improvement is deeply woven into Quinn’s fabric.

## OUR WORK

Over the past 45 years, our clients have depended on Quinn to manage projects with crews from 10 – 500 people across Western Canada. Quinn works alongside companies of all sizes, including some of the world’s largest resource producers, providing: turnaround services; construction and fabrication; maintenance services and sustaining capital projects.

*Since 1970, Quinn Contracting has provided the skills, experience & expertise to assist with plant expansions, modifications and de-bottlenecking operations.*

**Our personnel have been involved in all aspects of plant and field installations including: compressor stations, water flood plants, power boilers, battery sites and building renovations. Within our portfolio, we can offer:**

Administrative Services

With these services backed by our leading edge software packages, we are well positioned to provide superior value to our customers.

## OUR APPROACH

Quinn utilizes Project Management best practices to ensure our service delivery is specific to site and client needs. We're diligent in our efforts to promote continuous quality improvement while finding solutions and defining critical path activities. Before the start of any project, Quinn works closely with our clients in the initiation and planning phases to define the scope of work and align our work packages and work breakdown structure to meet their goals. As we execute the work, we rely on Quinn's more than 45 years of experience, our people and our high standards of quality and safety to ensure the job is done right. Through the controlling phase, we ensure active and engaged supervision and work site inspections to mitigate/eliminate non-compliance and rework scenarios. We apply a key performance indicator reporting format to ensure our supervisors and craftsman focus is on the right components of our execution strategy – Safety– Quality – Productivity – Cost.

At the close-out of a project, Quinn takes the time to review work packages and reflect on the project to develop better/improved methods to execute work, train and develop our workforce.

## SAFETY

Over the past 45 years, Quinn has earned a reputation as one of the most safety-focused companies in the business. We are committed to ensuring practical and effective procedures are in place to an industry-leading standard in occupational health and safety.

Achieving world class safety status requires a dedicated safety culture. Quinn celebrated One Million Consecutive Injury-Free Working Hours in October 2013 and again in October 2014. We work closely with our clients to establish high standards of performance. We also provide a well-trained workforce that is equipped with the necessary skills and knowledge to ensure safe-work practices are followed to the letter.

## QUALITY

At Quinn, our quality mission is to provide service that our clients can rely on. We strive to ensure policies, procedures and work instructions are of the highest quality and reflect the best practices of our industry.

All tasks are performed to quality standards as required by company policy, customer contracts, or governing legislation. These standards are shared broadly with our employees to enable full operational compliance.
