

# TURNAROUNDS

QUINN CONTRACTING LTD.

Get it done.

## TURNAROUNDS

On average, Quinn performs anywhere from 15 to 20 plant turnarounds per year. In over 45 years of business, we have provided turnaround teams to our valued customers ranging from 10 to 500 personnel. With this range of experience, Quinn knows how to ensure a successful turnaround from start to finish.

Leak-free start up: many contractors promise it, Quinn has the system to deliver it. With our Flange Tag Process we track, chart and inspect every Flange we install. We've found that when you ask a tradesperson to literally put their name on their work, they make sure they do it right. We believe in the importance of accountability and this ensures that our clients can count on the quality of our work.

## THE QUINN DIFFERENCE

Quinn realizes that shutting down a plant for scheduled maintenance work is critical to your business. A properly executed turnaround will increase plant and equipment reliability, continued production integrity and reduce the risk of an unscheduled outage or failure. A well-planned execution strategy is key to ensuring our clients' turnarounds go smoothly.

## UNRIVALLED EXPERIENCE

**Experience has taught us that site leadership is the true driver of a successful turnaround.** Strong site leadership keeps projects incident free, with proven problem-solving skills, helping to maintain and drive productivity. At Quinn, we are capable of providing some of the most effective turnaround leaders in the business; they ensure quality workmanship in a safe work environment.

We have built-in systems to support our key people in the field, developed from our knowledge and history. Quinn has well-established and tested best-practices in our turnaround business. Quinn's turnaround procedures and process are based on solid project management practices, but are designed to incorporate our clients procedures as required. We have a very comprehensive turnaround manual with procedures that define the processes to execute a turnaround through its five phases: initiation, planning, execution, controlling and close out.

## QUALITY WORK; QUALIFIED PEOPLE

**The quality of the people we provide is paramount to our success and the success of the turnaround.**

From off-site management, site coordinators and field supervision, to the tradespeople on site, the quality of the personnel is directly connected to the success of the turnaround. As a long-time player in the industry, Quinn has earned a reputation for attracting and retaining top-tier talent; Quinn has many employees with more than 25 years of experience with Quinn. Through targeted recruiting and a rigorous selection process, Quinn delivers people you can count on. To complement our skilled employees, Quinn is also able to provide specialty services such as scaffolding, bundle pulling and torquing to get the job done. With the right people working together towards the same goal, Quinn is equipped to meet and exceed service expectations.
